## Conditions of service / Quoting guidelines

- a) Rates may need to be individualised for customers in regional and remote areas, where the above rates may be insufficient to cover the higher costs related to travel and resourcing.
- b) The GST treatment of services is dependent on the type of service provided, and the source of funding. Avivo will refer to internal GST guidelines to ensure an accurate quote.
- c) Customers will be charged in full for supports where 48 hours notice is not given to cancel services.
- d) Support Workers services hourly rates incorporates travel to and from service. Regional and remote customers may need to be quoted additional time for travel, in 0.5-hour increments using the applicable hourly rates, depending on time and day of travel.
- e) The hourly rates above incorporate the cost of office coordination time. Some customers/ services may require a higher level of coordination than others. Where this is identified at the planning stage or during service delivery, we will discuss this with you and a quote provided for additional time, based on the additional time required at a rate of \$99/hour.
- f) Minimum charge is one hour, charged in 30 minute increments
- g) All new customers are charged the establishment fee. No fee for existing customers.
- h) Rates apply to all service types (personal care, domestic assistance, respite care and social support).
- i) Training or education provided by nurse consultants will require an individual quote.
- j) Classification of customers into 'standard' or 'specialised' support should follow the guidelines below:

<b>Standard</b>	For customers with low to medium support needs that do not require Support Workers specifically trained in Specialised Care skills.
<b>Specialised</b>	For customers with medium to high supports needs that require Support Workers specifically trained to undertake clinical and specialised care tasks. These specialised care skills may include, but are not limited to, bowel care, catheter care, peg feed, respiratory management, tracheostomy care and management, oxygen therapy and oximetry. Further training may be provided by our Registered Nurses.
<b>Individual Quote</b>	Support needs beyond 'specialised', for customers requiring ongoing highly specialised care.

Fee for Service pricing is reviewed annually. Next review date 1 July 2026.
